### ABOUT ME

- Website Developer with 3+ years of experience and confident in building responsive, accessible, and high-performance websites using HTML, CSS, JavaScript, React.js, Bootstrap, and Tailwind CSS. Also have 1 year of experience developing full-stack PHP Laravel websites.

### Work Experience

- **Fiverr**  
I started my freelance journey on Fiverr, working with international clients on WordPress projects. I also handled PHP and Laravel full stack projects, strengthening my backend skills and gaining valuable real-world experience.
- **Corammers**  
At Corammers, I worked on frontend development and PHP Laravel projects, building responsive websites and integrating APIs. I focused on performance optimization, solving technical challenges, and delivering projects on time. This experience strengthened my skills,

### Education

- 2016-2018  
Punjab Group of Colleges  
Pre Engineering
- 2019-2023  
University of Gujrat  
BS in Information Technology

### What I Am Looking For?

- I am looking for a frontend development role at a company with a strong, collaborative team, where I can work on modern, real-world projects, enhance my skills in technologies like React.js and JavaScript, and continue growing as a frontend developer.
